8- Payment of scholarship students

For scholarship students whose exemption rates are known at the beginning of the school year in September, a payment schedule is established and given to the parents who must respect the deadlines.

Families waiting for disclosure of the exemption rates (2nd commission) are required to pay the full costs until the final exemption rates are obtained. The school will carry out a regularization of the accounts and if necessary a payment schedule will be established and communicated to the parents.

9- Absences

Any absence, of any kind, of any duration, will not be subject to any refund or partial deduction

10- Provisions in case of non-payment

The payment of tuition fees owed by families, including when expected from a third party debtor, is essential for the operation of French educational institutions abroad. The position taken by families who evade their obligations by refusing to pay their tuition fees, jeopardizes the balanced budget of an institution and is inadmissible.

An invoice corresponding to the state of the tuition fees is published and sent to each family concerned at the beginning of each recovery period. If the family has not paid the amounts due within 15 days after receipt of the notice, a first reminder, setting a specific deadline, will be made. If no financial regularization takes place before the next term, then the child will no longer be accepted at school.

In case of proven economic difficulties of the family, the school may offer a payment in installments. The schedule will be formalized by a time agreement signed by the director of the school and the family. This schedule will be followed up and will not be renewed if it is not respected.

Any family not being up to date with its payments at the end of the school year will not be able to claim a registration of the children at the next school year.
